

# Zeal College of Engineering and Research

## Subject: LP-VI

Name: Jenil Girish Rathod

Class: BE

Div: B

Batch: B1

Roll No: B22009

### Group B: Practical No:4

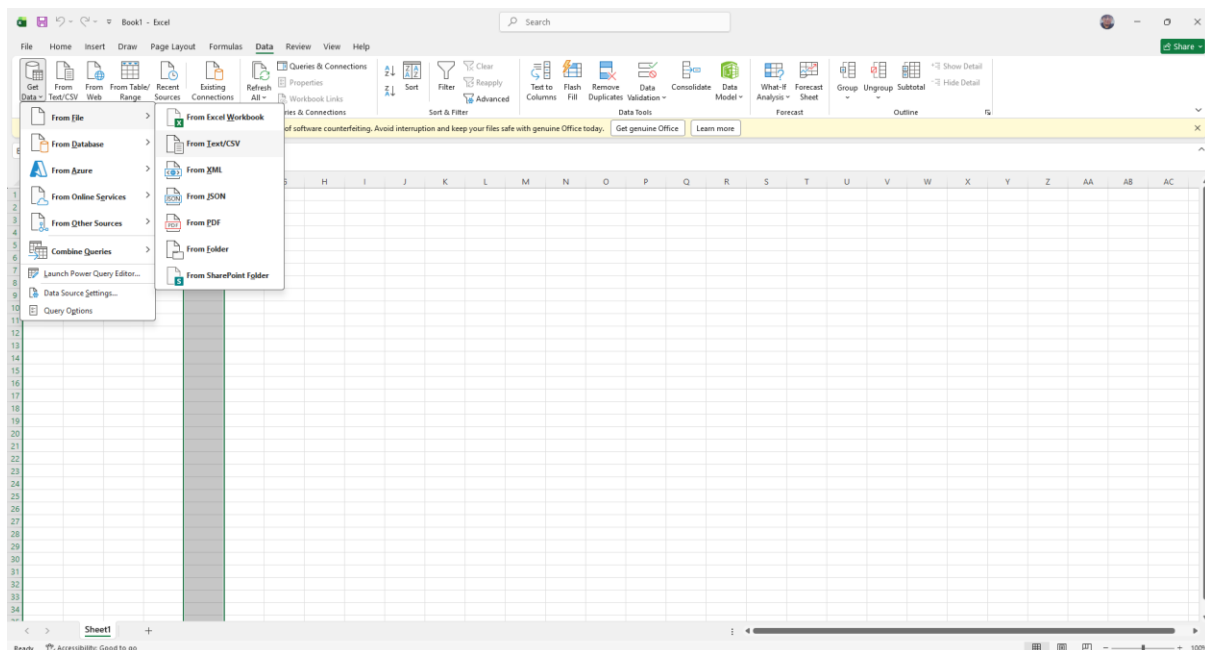

**Program Statement:** Import the data warehouse data in Microsoft Excel and create the Pivot table and Pivot Chart

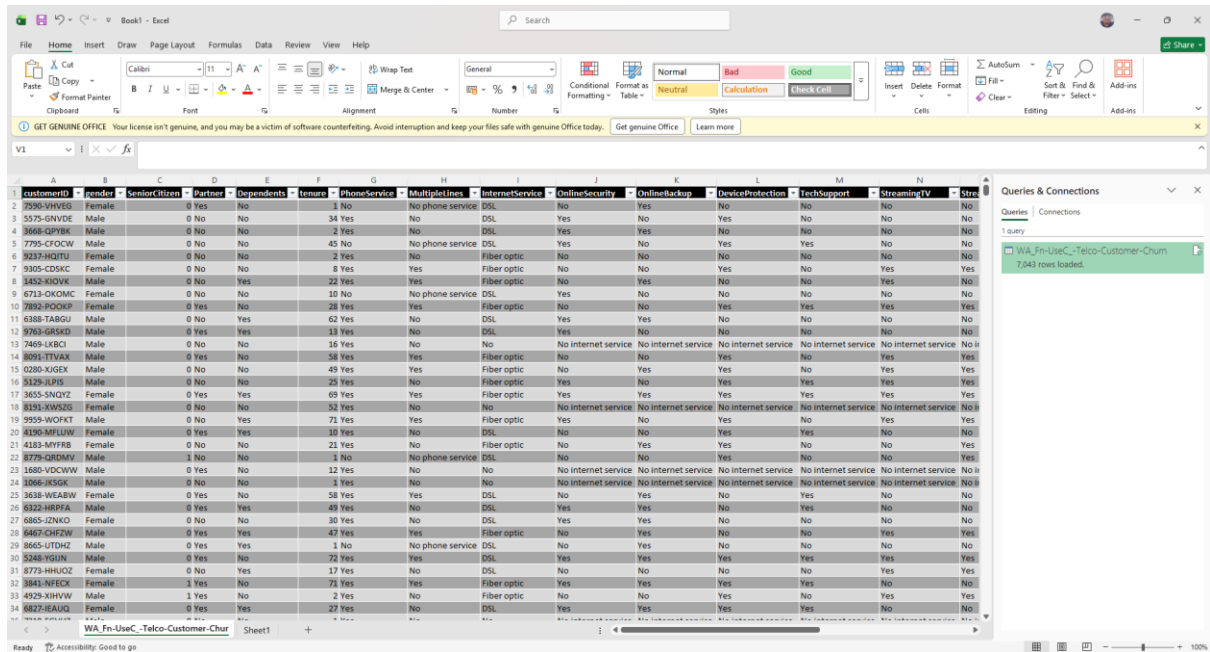

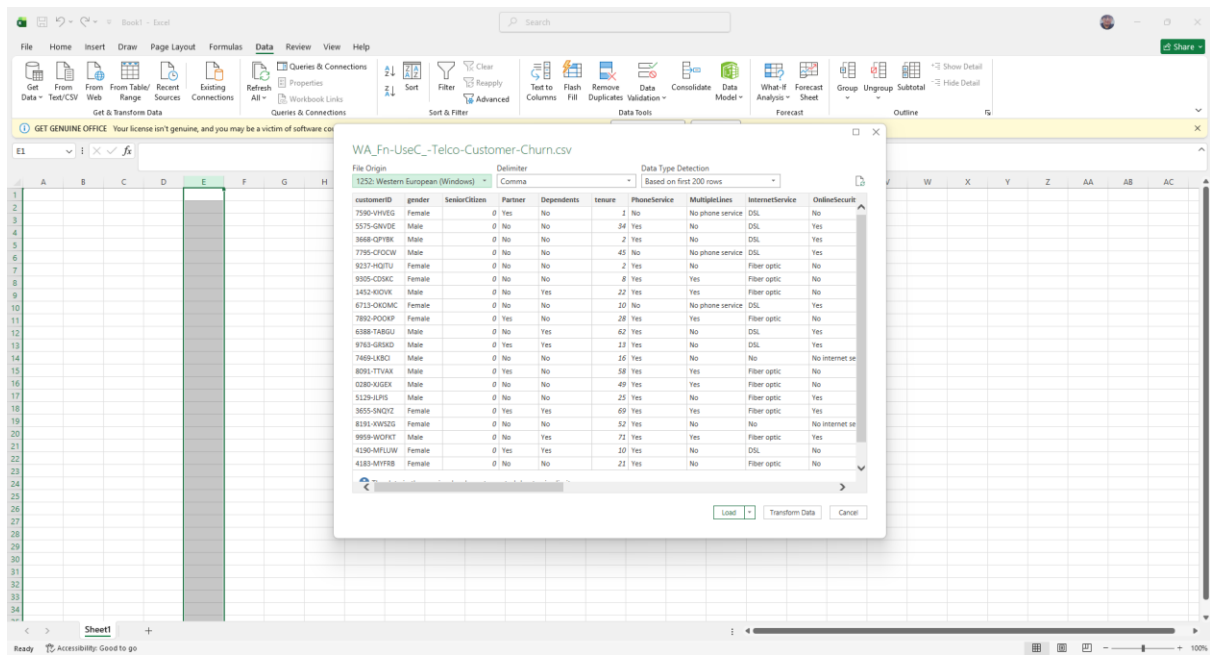

#### STEP 1: Get the Data

1. Download dataset
2. Save it on your system

#### STEP 2: Open in Excel

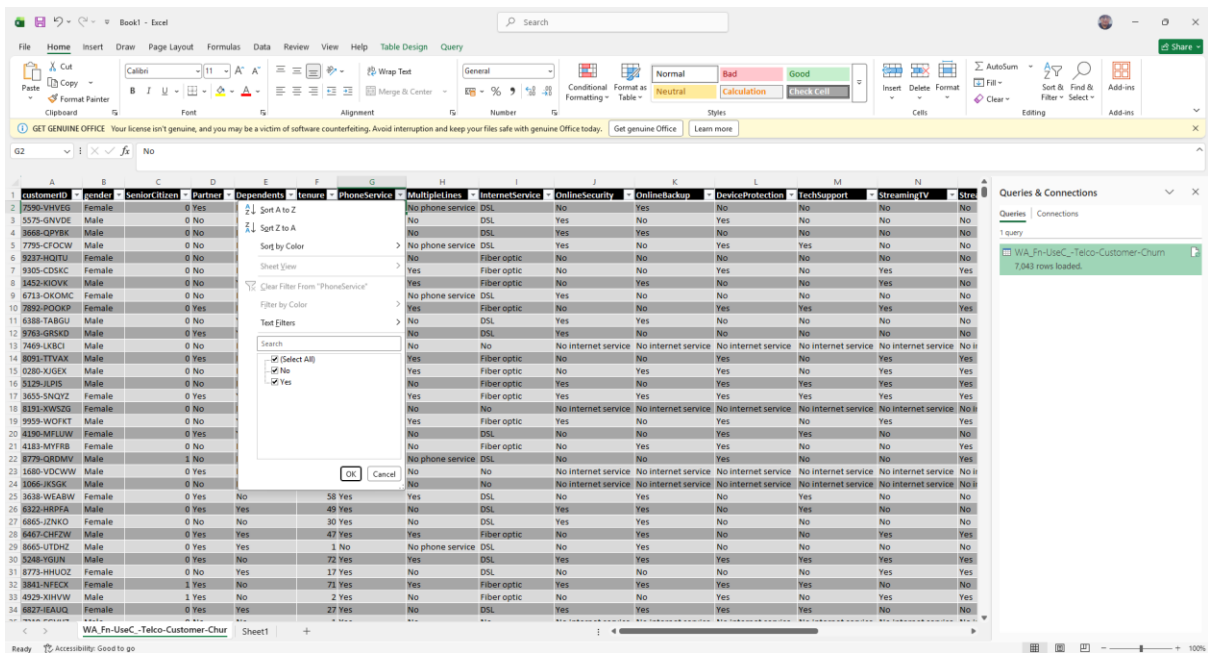

1. Open Microsoft Excel
2. Go to: Data → Get Data → From Text/CSV
3. Select your dataset
4. Click Load

### STEP 3: Check Data

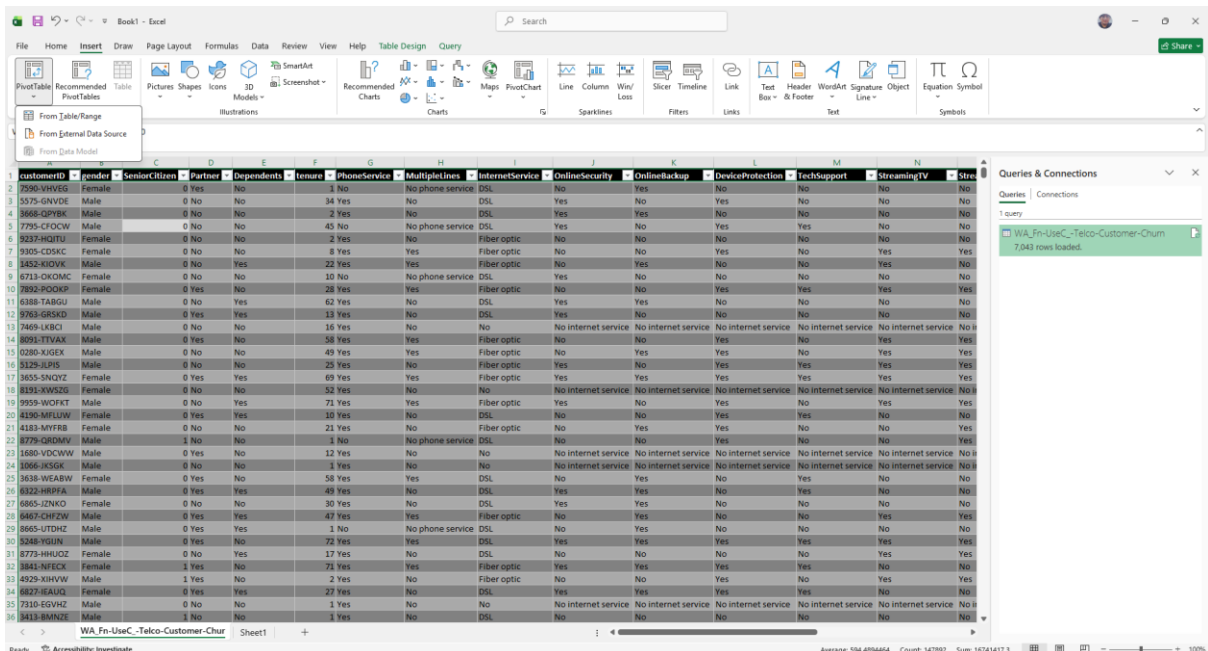

1. Ensure all columns are visible
2. Check:
  - a. Churn (Yes/No)
  - b. Contract
  - c. Gender
3. Remove blank rows if any

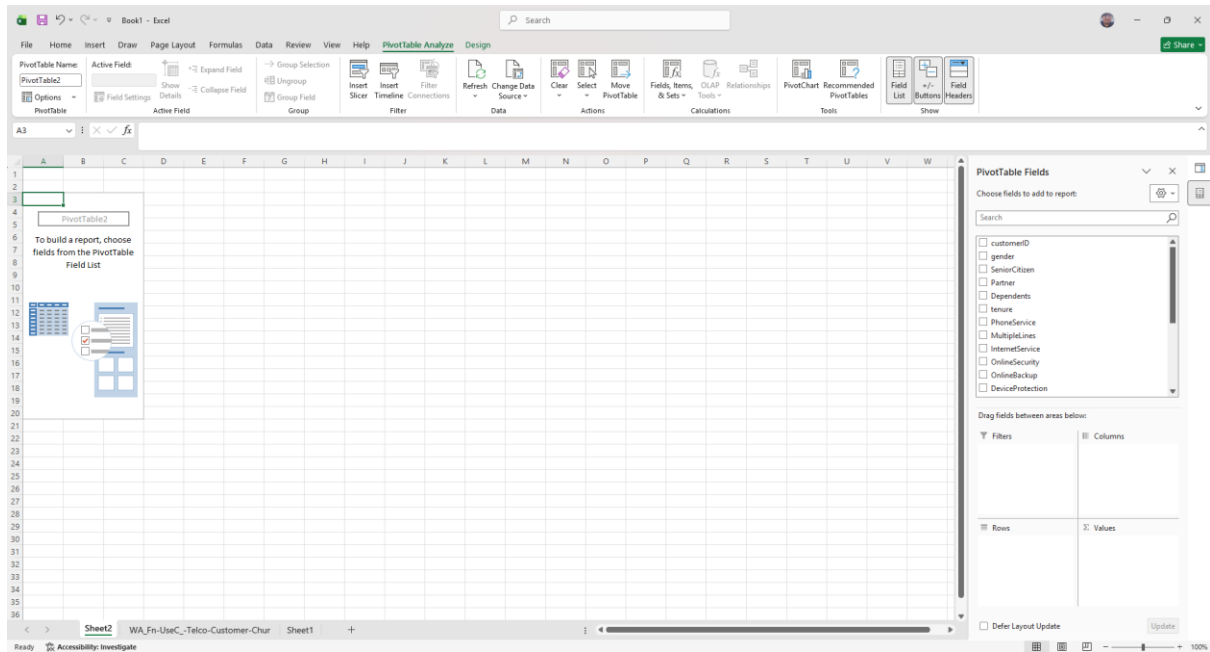

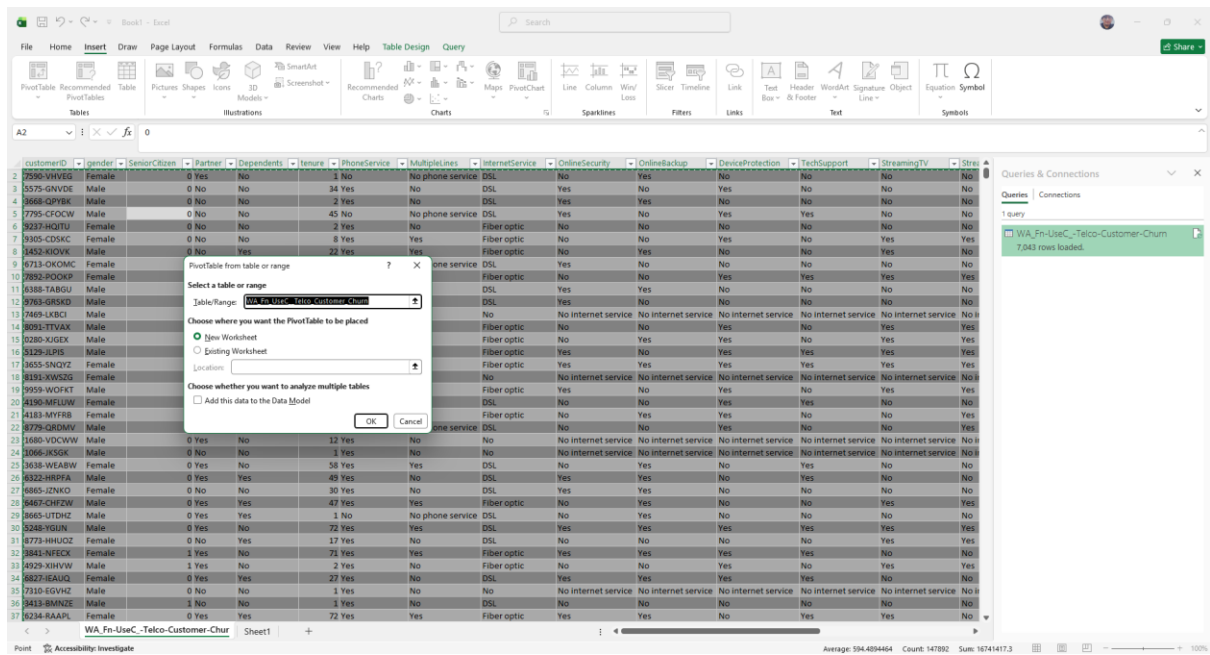

## STEP 4: Select Data

## STEP 5: Select Data

1. Go to: Insert → PivotTable
2. Select: PivotTable → Table/Range
3. Select: New Worksheet → OK

## STEP 6: Create Pivot Table

1. In the PivotTable Fields pane, drag **Churn** to the Rows area
2. Drag **Churn** to the Values area
3. Set the value field to **Count**
4. The Pivot Table will display the number of customers who stayed and churned

The top screenshot shows an Excel PivotTable with the following data:

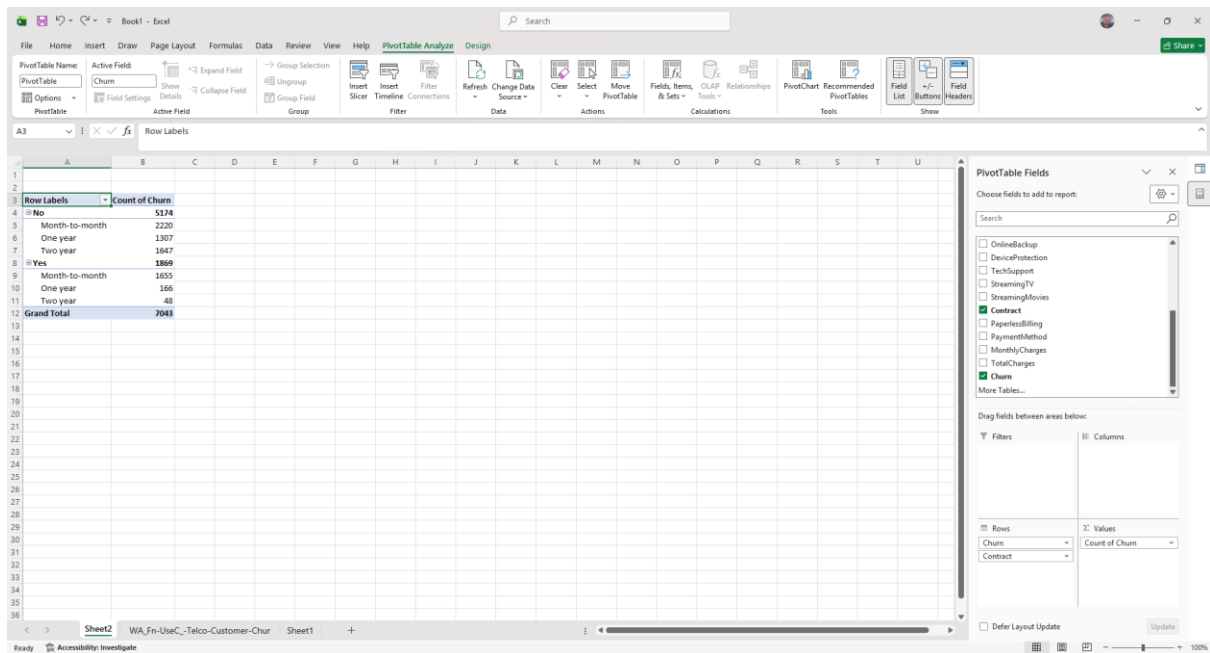

| Row Labels         | Count of Churn |
|--------------------|----------------|
| No                 | 5174           |
| Yes                | 1869           |
| <b>Grand Total</b> | <b>7043</b>    |

The bottom screenshot shows the same PivotTable after adding 'Contract' to the Rows area. The data is now categorized by contract type:

| Row Labels         | Count of Churn |
|--------------------|----------------|
| No                 | 5174           |
| Month-to-month     | 2220           |
| One year           | 1307           |
| Two year           | 1647           |
| Yes                | 1869           |
| Month-to-month     | 1655           |
| One year           | 166            |
| Two year           | 48             |
| <b>Grand Total</b> | <b>7043</b>    |

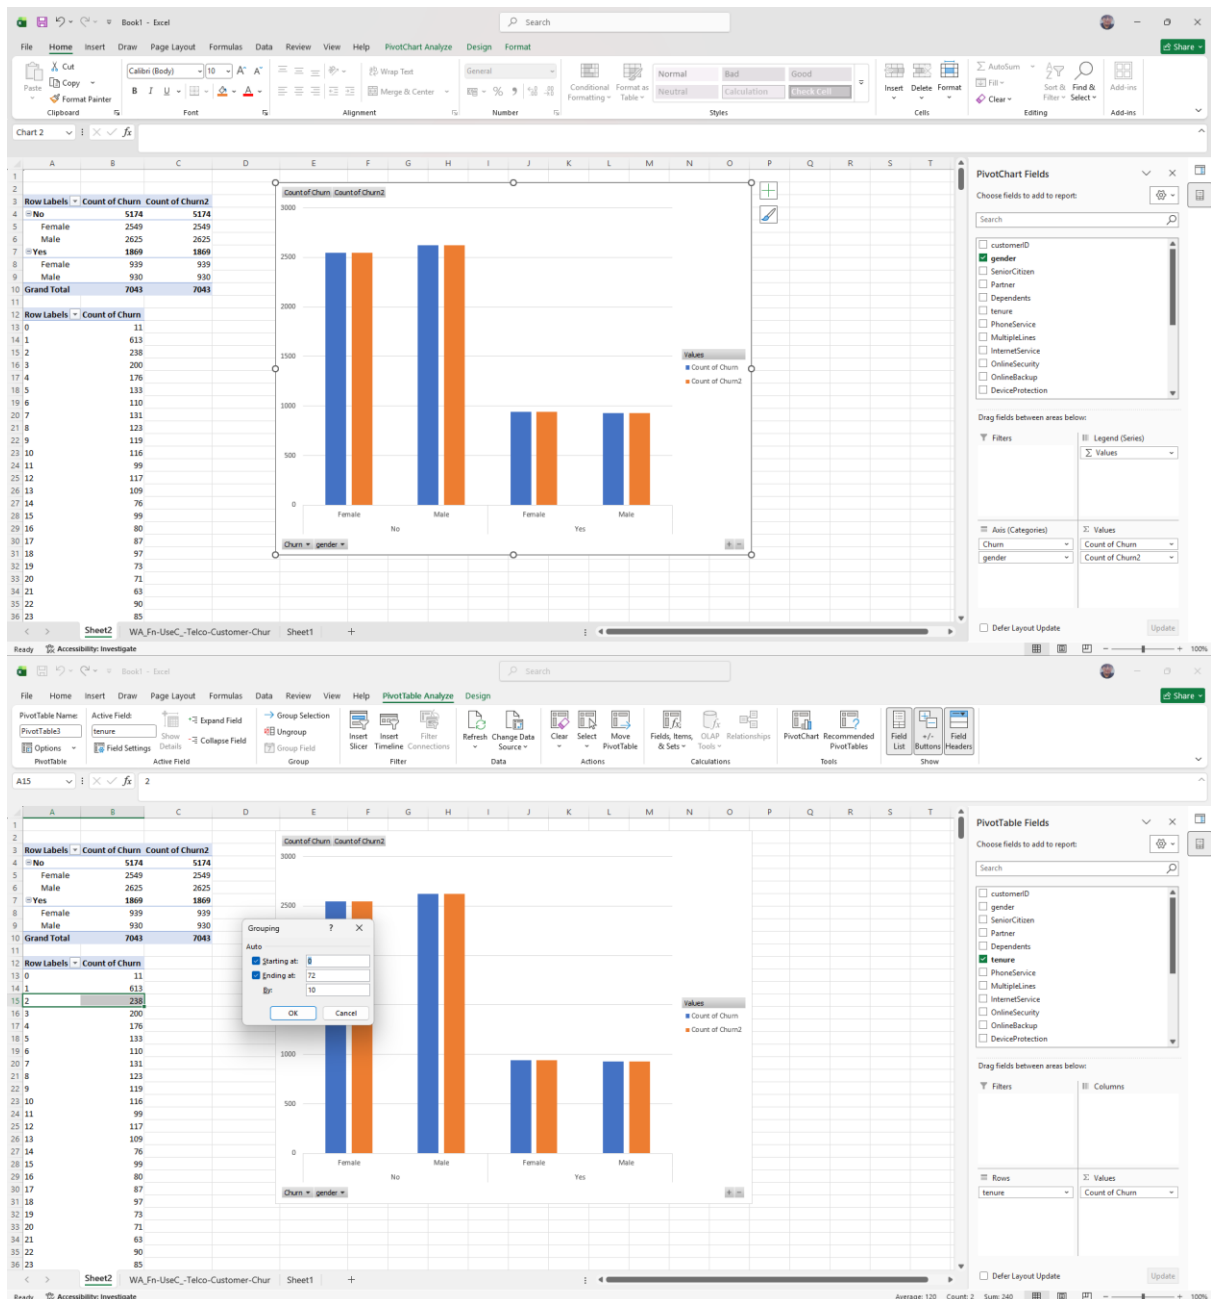

## STEP 7: Create Additional Pivot Table

1. Insert another Pivot Table
2. Drag **Contract** to Rows
3. Drag **Churn** to Columns
4. Drag **Churn** to Values (Count)
5. This shows churn distribution based on contract type

## STEP 8: Create Pivot Table for Tenure

1. Insert a new Pivot Table
2. Drag **tenure** to Rows
3. Drag **Churn** to Columns
4. Drag **Churn** to Values (Count)
5. Select any tenure value
6. Go to **PivotTable Analyze** → **Group Selection**
7. Group data into intervals (e.g., 0–10, 10–20, etc.)

## STEP 9: Create Pivot Chart

1. Click inside any Pivot Table
2. Go to **Insert** → **PivotChart**
3. Select **Column Chart**
4. Click OK
5. Format the chart and add title: *Customer Churn Analysis*
